Thank You for purchasing the Vestax Original Accessories: for Vestax turntables of the PDX Series, there was designed Japan LED lamp with connection base in the form of a standard RCA connector.

For Vestax turntables of the PDX series, there was designed a special LED lamp with a connector base in the form of a standard RCA type audio connectors.

Used for high-quality illumination of the turntable workspace, especially where the stylus of the pickup meets LP vinyl. The lamp body is made of hardened ABS plastic in black colour. It is fitted with one 2W LED HQ circular element.

Bright white LED light with optimum color temperature 5.600 °K guarantees the user the perfect illumination of the LP vinyl on the Vestax turntable plate and it gives you a perfect overview and orientation (what happens at the point of contact stylus of the pickup with the LP vinyl). DSL-1 is designed for strictly power voltage DC 12 V / 20 mA.

INSTALLATION OF DSL-1

When the device is switched off, insert the DSL-1 lamp body vertically downward into the RCA socket (as shown by the arrow in the picture).

Press lightly to push the DSL-1 lamp body into the RCA connector socket. Then the lamp is ready for operation.

IMPORTANT INSTRUCTIONS

Use only original Vestax LED lamps. Otherwise, it may damage the electronics circuitry of turntable!

Do not remove the DSL-1 lamp during operation turntables. First, switch off the turntables with the ON/OFF button!

SAFETY WARNING

	CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN	
BEFORE REPLACING THIS PART DISCONNECT THE DEVICE FROM THE POWER SUPPLY REFER SERVICING TO QUALIFIED SERVICE PERSONNEL		

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE

Changes or modifications may cause this unit to fail to comply with Part 15 of the FCC Rules and may void the user's authority to operate the equipment.
