

Thank you for purchasing the Vestax Original Replacement Parts: PDX mech.insulator designed for each type of turntables. Three types are produced for the

- QFO Series
- Controler ONE Series
- PDX-2000
- PDX-3000

Installing

- ① Check turntables chassis threads before installation TT.AVB foot. The threads must be intact. Before mounting a special treat with ceramic grease. After screw the TT.AVB foot into the chassis brackets. Do not tighten fully! Check that the foot can rotate freely.

ADJUSTMENT(S)

Adjustment

- ① Place the turntable on a perfectly horizontal and solid surface.
- ② Use a spirit level to calibrate; gradually balance the turntable to the perfect horizontal position.

NOTE

Perform balancing with the plate attached.

- ③ After you have finished balancing the turntable, just start balancing the pickup arm, not vice versa.
