

PMC-05PRO III / SL VCA

PMC-05PRO III VCA

PMC-05PRO SL VCA

The standard PMC-05PRO3 / 05ProSL series upgraded with Vestax's original discrete VCA circuit!

FEATURES

- Originally, the volume circuitry in cross faders used photocoupler devices. But unfortunately the devices were discontinued. As a solution and result of research, Vestax successfully developed an original full discrete VCA circuitry
- Cross faders can be replaced with CF-PCV. Power adaptor is AC-14
- Cross fader cut lag spacers, CLS-1 is included in the cross fader.
- VCA version will not send out distorted sound when volume is raised.
- The crossfader curve has been adjusted to operate and simulate exactly to the drawing. (Right Corner below Master Volume) The crossfader functions smoother than any other, a perfect curve from mixing to sharp cutting.
- More head room
- Master outs +6dB - Headphone output +8dB

SPECIFICATIONS

PMC-05ProIII VCA

■ INPUT : LINE(RCA) x2 / PHONO(RCA) x2 / MIC(PHONE) x2 / EFFECT RCV(RCA)

■ OUTPUT : MASTER(RCA) x2 / EFFECT SEND(RCA) / HEADPHONE(1/4inch Headphone Jack)

■ MEASURE : 262(W) x 106(H) x 320(D)mm•4.0kg

PMC-05Pro SL VCA

■ INPUT : LINE(RCA) x2 / PHONO(RCA) x2 / MIC(PHONE)

■ OUTPUT : MASTER(RCA) x2 / HEADPHONE(1/4inch Headphone Jack)

■ MEASURE : 262(W) x 106(H) x 330(D)mm•4.0kg
