VESTAX PRODUCT INFORMATION                                    JAN.2010

# TR-1／TR-1BLK USB MIDI CONTROLLER

Black Color Panel **New!**

TRAKTOR

## INTRODUCTION

The TR-1 is a collaboration of Vestax and DJ HIROSHI WATANABE, one of the pioneers who established laptop based DJing in Japan.This radical MIDI controller has been designed from a professional's point of view, making it compact and extremely useful when you're in the mix. Its compatibility with Traktor Pro is remarkable

## FEATURES

Channel Select switch : The channel select switch selects the deck you wish to control. Maximum 4 decks can be controlled at the same time.

SHIFT button : The shift button enables to assign two different controls to one button. The second control is activated when the shift button is pushed together.

LED BRIGHTNESS CONTROL
The brightness of the LED's are adjustable, let them glow stronger when playing in dark places.

I.F CURVE
Adjustable IF(Input Fader) curve to match your mix style.

Soft push switches for tireless mixing
Smooth 60mm slide input faders for high-precision mixing
Controls over 160 parameters of compatible software
A compact, durable and easy-to-operate body design that ensures excellent reliability on tour

## WHO'S HIROSHI WATANABE?

World wide tech-house creator and photographer, also known as KAITO, QUADRA and TREAD. Hiroshi truly is an artist, always on the challenge for new expressions.

Said Hiroshi:
Until this day, there is no other professional DJ controller as easy to operate for me, and the 2 years of development I partnered with Vestax proves it. As named, it became a model specialized for Native Instruments TRAKTOR PRO, which controls nearly all features with this one unit, instantly from the control panel either it being 2 channels or 4.Using the TR-1, you will no longer feel the time code necessary, and I assure you will be able to perform at your best, with the most simplest setup, a laptop and a controller. This is the ultimate setting of a DJ setup I have pursued, and the TR-1 was developed to make it come true. Once you have played the TR-1, you will understand the meaning of why the TR-1 is a professional model. This is the ultimate DJ controller which has top class appearance, functions and touch. I wish you to experience a new world of mixing together with the TR-1.
