

TR-1

PROFESSIONAL USB MIDI CONTROLLER

TRAKTOR

INTRODUCTION

Developed together with Hiroshi Watanabe, one of the pioneers of computer based dance music, "TR-1" was designed from a professional DJ's point of view for the new MIDI controller to be "compact" with "well thought out" control layouts built for functionality.

FEATURES

- > New soft push switches for tireless mixing.
- > Smooth 60mm slide input faders or high-precision mixing.
- > Selectable deck control (Max 4channels. A&C controlled by PGM1, B&D controlled by PGM2).
- > New SHIFT switch feature to customize deck control functions.
- > Adjustable LED light volume.
- > Can control up to more than 160 parameters of compatible software.
- > A compact, durable and easy-to-operate body design that ensures excellent reliability on tour .
- > Traditional Vestax white gold face plate and knobs.
