

TT-M1 versionV

DIGITAL VINYL SIMULATOR

Control your CDX-05 / CDR-07
with your turntable.
Digital Vinyl Simulator Set

Compatible models

CDX-05

CDR-07

FEATURES

The TT-M1 is a unique sensor unit that allows DJs to control their CDX-05 / CDR-07 with turntables. Scratch, hold and back cue your CDs like never before, always precise, on point for digital djjng and digital scratching.

Until now, TASCAM's TT-M1 was attachable to Vestax's PDX-2000 and PDX-2300 and was necessary to purchase the TK-1P in order to attach it to the PDX mkII and mkII Pro series. The TT-M1 versionV includes all attachments to mount it to any PDX turntable available to suit your needs.
