

TUB-2

Audio Converter

The TUB-2 is an interactive converter which converts audio input/output from various devices to computers. Connection between DJ mixers, the Vestax handytrax and others with the TUB-2 enables vinyl and other analog data transfer to computers.

Also, digital sound file output from software to mixers via USB to mix with vinyl and CD's and output to other audio devices. The TUB-2 provides Vestax tuned high grade sound quality, operates with USB bus power and does not require any drivers for connection with Windows and Macintosh computers.

FEATURES

- > Simple plug-and-play analog audio (stereo) signal transfer via USB
- > Built-in high-quality RIAA equalizer for connection with LP record players.
- > PHONO/LINE input mode select switch
- > Light weight, compact and no external power adaptor required. (USB bus powered)

SPECIFICATIONS

- >1 Phono/Line stereo input (RCA)
- >1 Phono/Line stereo output (RCA)
- >1 GND Terminal
- >Full-speed USB transceivers
- >Fully compliant with USB 1.1
- >Bus powered
- >16-bit Delta Sigma ADC & DAC
- >Dimensions : 58mm(W) x 44mm(H) x106mm(D)

- >DAC : Sampling Rate: 32, 44.1,48kHz
THD+N = 0.005%, Dynamic Range = 93dB,
Oversampling Digital Filter

- >ADC : Sampling Rate: 8, 11.025, 16, 22.05, 32, 44.1,48kHz
THD+N=0.001%, Dynamic Range = 89dB
Decimation Digital Filter, Antialiasing Filter Included
Digital LCF Included
