

VCI-380

PERFORMANCE CONTROLLER

serato  ITCH

THE CONTROLLERIST

VCI-380 is a powerful and creative 2 channel DJ controller with a built-in DJ mixer.

Designed hand in hand with Serato and bundled with ITCH, providing an arsenal of musical craft tools with perfect integrity, straight out of the box.

VCI-380

PERFORMANCE CONTROLLER

5

5 Performance Modes

PAD FX

The 2x8 premium FSR pads trigger 5 creative performance modes. Hot Cue, Auto Loop, Roll, Sampler, and the incredible Slicer from ITCH. The multicolor color LEDs behind the pads make each performance mode highly intuitive.

Experience the world's first PAD FX system with VCI-380! Pad FX are controlled by aftertouch of the trigger pads, and at the same time triggers each Performance Mode, creating unique and original combinations.

Stand-alone Mixer

Amazing sound

Scratch Jogwheels

The two control channels of VCI-380 also function as an analog mixer, multiplying the possibilities of your Dj setup. 2 turntables, 2 CD decks or a DVS interface, the choice is yours.

The built-in 24Bit/48Khz Bit Perfect audio interface outputs the DJs mix via Balanced XLRs with amazing clarity and the Booth out adds flexibility to the audio setup.

Vestax has designed the ultimate jog wheel for every type of Dj. Wide, heavy but with perfect inertial action and superb friction that could only be felt on slipmats placed on turntables. Torque can be adjusted to the DJs preferred tension. The needle position indicator embed in the platter matches perfectly with the virtual deck in ITCH, for accurate scratching and beat juggling.

- 2 Channel USB MIDI controller for Serato ITCH
- Built-in 24Bit/48kHz audio interface
- 2 x 8 Performance Pads with Aftertouch control
- 5 performance modes (Hot Cue, Auto Loop, Slicer, Roll, Sampler)
