VCM-600

MULTITRACK REMIX CONTROLLER

live lite7
✕ Vestax
EDITION

MIDI SUPERIORITY AT YOUR FINGERTIPS!

INTRODUCTION

The VCM-600 is a DJ MIDI controller designed with Vestax mixer technology. 160 parameters of the DJ software can be assigned to the advanced control section, and has excellent compatibility with Ableton LIVE.

The VCI series was designed with JOG wheels to duplicate turntable operation. On the other hand, the VCM-600 is a controller specialized for mixing, which offers excellent performance to DJs who mix with digital music media and computer based systems.

The VCM-600 shares the same quality control parts used on Vestax mixers and 2 LED panels are placed on each side of the controller to illuminate the top panel for clear operability and vision in clubs.
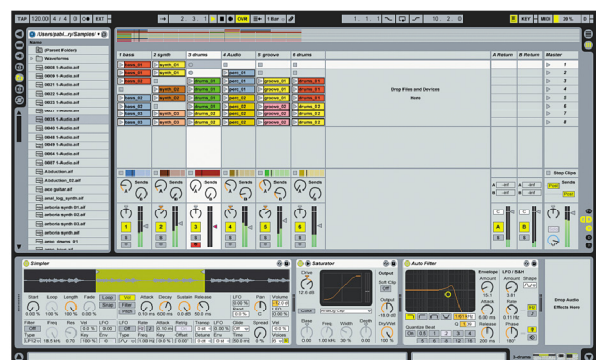

JAN : 4516184 700071

FEATURES

> The VCM-600 can control 160 parameters of Ableton DJ software and other MIDI compliant software with high resolution MIDI signals sent via USB.

> Multi track control (track bank)

> High quality input faders and pitch faders from the VCI-100 and PMC-580 are also applied to the VCM-600 for advanced operability.

> Vestax quality Input fader/Cross fader curve control

> Simple plug & play activation with Apple and Windows operating system computers.

> Lightweight, high durability aluminum body
