

# ONE CONTROLLER TWO SOFTWARES THOUSANDS OF POSSIBILITIES

Dedicated to control effects of Serato software, the Vestax VFX-1 now plays on both battlefields, filling up the gap between Itch and Scratch Live.

Smart and handy, the smallest of professional controllers opens a new path of creativity for all Serato DJs.

**Express yourself. Twice.**

# VFX-1 USB FX CONTROLLER

## One controller, two softwares

- The Vestax VFX-1 is now compatible to control effects both on Itch and Scratch Live from Serato.
- Vestax has designed and bundled a new overlay for Scratch Live users, to get into controlling FX section faster and easier.
- In purchasing VFX-1, you have two versions in a box: now is the time to perform your Serato Scratch-Live with effects!
- Amazing on Itch, Unbelievable on Scratch Live!

## VFX-1 and Scratch Live

- The VFX-1 comes with two vertical and horizontal removable overlays. You can choose to set your VFX-1 on top of your mixer, or between your mixer and your turntables.
- Select an effect and assign it directly from the VFX-1, without using the mouse.
- Precise control of the parameters with a large FX Control aluminum knob.
- Use Latch mode to create trigger effects.
- 3 switches and 1 push encoder available for free Midi Mapping.

## VFX-1 and ITCH

- Control 12 effects on Itch with the VFX-1, the only serato ITCH FX unit which is able to control up to 4 parameters.
- Chain the two effects sections on the same channel to create unique sound combinations.
- Use Latch mode to create trigger effects.
- The VFX-1 and VCI-300/MKII is the most complete and compact solution for ITCH.
